The sockets can be placed in different places- Please stay clear of the brackets from the legs.

- 1** Tilt the sofa, and place in on the back. **Please note : lift the sofa as you tilt it to avoid braking the legs.**
When the sofa is on the back you can start mounting the bracket .

- 2** Place the bracket away from the legs. Measure your electrical Evo Line socket and out the screws.

- 4** Open the end cap and slide the socket over the brackets .

- 5 Click the end cap back on the socket and secure the cable with cable binders in the desired direction. please note that the cable should be secured .

- 6 Tilt the sofa back and place in on the Legs. **Please note : lift the sofa as you tilt it to avoid braking the legs.**
